8. Tips

WIDGETS

WHAT IS A WIDGET?

Android widgets are mini apps that run on your Android Home screen. Widgets are not the same thing as the shortcut icons that allow you to launch an app. Widgets generally display data and take up more space than a single icon.

GETTING MORE WIDGETS

Did you know when you install new apps a new widget might come with it? Depending on the apps you install you may have more a widget selection to choose from.

APPS TO REMEMBER
